

It is summer and it is time to relax, travel and enjoy the warm weather. But it could be just the right time for a stay-cation in your home. After all the spring cleaning, your house may be the most quiet, soothing place to be this summer. No crowds, no traffic, no waiting in lines. And with Father's Day this month, your home may be the best place to celebrate the holiday and experience all the good things that summer offers.
